Subject: Re: Ramazzini

Ramazzini does only cancer studies. That's why we broke up methanol and moved the noncancer assessment forward.

Does the NTP report only opine on cancers or does it also include non-cancers? For methanol (non-cancer) will we be using RI data?

Subject: Ramazzini

Hello -- Knowing that the Ramazzini Institute might be a subject of urgent discussions, I put together a briefer summary of PWG results and three pertinent cases to consider (see the end of the attached paper). These cases suggest that leukemias/lymphomas are out and everything else could be case-by-case. It's not clear that "solid tumors" are generally in or out, and the NTP report makes no mention of solid tumors as a group ... Good luck, Vince
